

DIGITAL GLOBES

Engage's multi-user, multi-touch digital displays with a spherical screen enables users to present global information and promotional media in one of the most compelling and interactive ways possible. Available features include the dome itself; internal projection surface (polymer-coated sphere); self-contained kiosk and PC; ELO projector with 3,500 Lumens+; IR camera and IR array; multi-touch interactive software; remote features for uploads of updated content. In addition, we can offer bespoke content to client's specifications; bespoke kiosk design; larger-diameter systems; HD systems; and remote service & maintenance.

Engage recently added **PufferSphere** globes to the Innovation Store. **Engage's** range of **PufferSphere** spherical display systems let you deliver 360° video simply and quickly across a range of commercial and artistic projects.

The **Puffersphere M** boasts a small footprint, is easy-to-integrate, and utilises volumetric video displays for high-brightness environments. It is simple, portable, rugged and full 360°, and can be ground-standing or inverted. There are no blank spots, no mirrors, no secondary lenses. It can be used as a stand-alone unit or in networked fleets.

- Internal Frame Dimensions
578mm x 478mm
- 600mm **Puffersphere M** Dimensions
64.1kg / 1,474 mm H 619mm W
- 900mm **Puffersphere M** Dimensions
74.3kg / 1,774 mm H 900mm W

The **Puffersphere XL** is simple, flexible and tour-toughened. Groundstanding or inverted, it offers a full 360° video display with no blank spots and a sub-15-minute set-up time. Rugged and modular, the **PufferSphere XL's** versatility allows you to switch seamlessly between large format inflatable and smaller high-brightness HardBall spheres as your clients require.

- Dimensions without sphere
850mm x 950mm
- Hardball Spheres
from 900mm - 1200mm diameter
- Inflatable Spheres
from 1600mm - 2500mm diameter
