

# HOLOGRAPHIC DISPLAYS

**Engage** supplies cutting-edge HD holographic units and can also provide bespoke content as a turnkey retail solution. We supply a unique 3D display called **Dreamoc**, that provides users with the opportunity of combining real products with free-floating 3D animations.

The **Dreamoc** comes in two sizes: standard and XL. It is designed to be used in almost any environment, including showrooms, reception areas, exhibition stands, or as a shop-in-shop display. Engage can produce any bespoke design required for the **Dreamoc** system and for all retail deployments. Content can be networked and updated remotely from a CMS system within client or agency office – which **Engage** can custom create also.

You can buy or rent systems from us, and we can produce the 3D animation – whether you want your logo floating inside the **Dreamoc**, or you want to make a detailed presentation of your product in 3D, virtually anything is possible.

#### Features:

- Elegant & minimalistic product display
- Combine a physical product with 3D holographic content
- Bright and sharp picture quality
- High ambient light tolerance
- Plug and Play setup
- Easy change of content
- Key protected door

#### For all enquiries contact:

Engage Production Ltd  
Studio K01  
The Biscuit Factory
